Hladinka is the most common way to drink beer. It is based on single-stroke drawing to create a wet creamy foam at the end that will not exceed the edge of the glass.

Šnyt is a smaller amount of beer with a larger proportion of creamy foam. The very thick layer of foam gives the beer a finer cut and keeps it fresh for a long time. Therefore, the spinner is suitable as a chocolate beer for tapping or also an ideal choice for those who no longer have the taste or time for big beer.

Mlieko - we mean half a thick, creamy foam. It's a way to drink beer, which is especially popular with women. Milk is smoother compared to the level or shin.
